

Programme Governance and Systems Evaluation

Invenica worked with **Vodafone Online** providing a team of industry experts in strategy, business analysis and technical design.

Vodafone Online is the strategic business unit that provides a uniform online product offering and experience to their Operating Countries and Partner Markets.

The project brought together a core team of principal consultants with experience in Vodafone Global Technology and expertise in Oracle Portal, CMS, SSO/IDM, Fusion and ATG. Invenica were able to translate large-scale business requirements into technical specifications.

/What we did

Invenica supported the project with full program management, coupled with large scale platform integration and specialist teams with extensive technical knowledge.

/What we delivered

Our experience of complex problem solving, while managing communication with multiple stakeholders in business and technology, delivered across a range of disciplines:

- /// Define and document business requirements across key Vodafone Operating Countries for each product component
- /// Secure local market buy-in to the global online initiative and product offering
- /// Produce solution designs and systems requirements specifications for the product verticals and components
- /// Provide technical project management and Oracle subject matter expertise to govern and manage overall delivery

/About Invenica

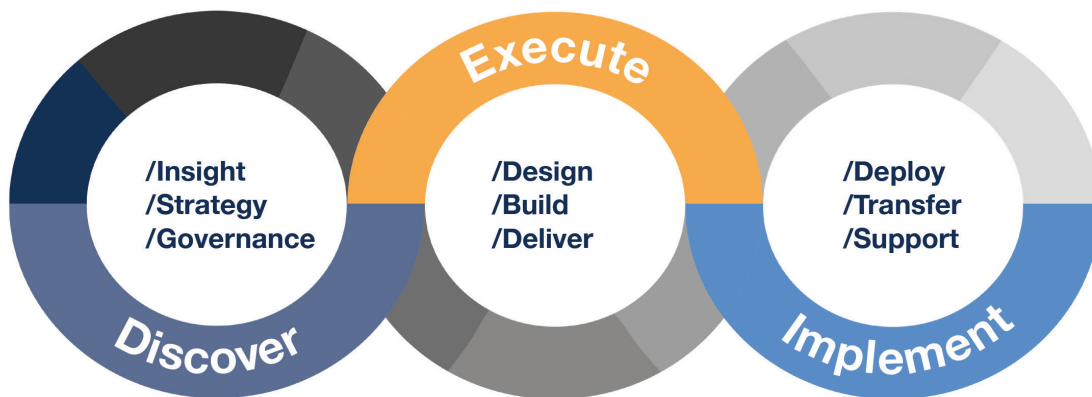

Invenica is an independent technology development and consultancy company. We use technology innovation to solve difficult problems for our clients.

We have deep technical and industry knowledge, and a breadth of experience delivering complex enterprise projects. We work for global blue-chip companies, delivering mission critical solutions in the most demanding of environments. We help our clients develop a clear IT strategy – working with them on POCs and Prototypes that deliver a tested and “fast tracked” approach.

/Discover the Possible

We launched our “**Discover the Possible**” program in January, and over the coming year, we will be exploring the challenges and opportunities of emerging technology. We will be separating the fact from the fiction, translating the buzz words and jargon into simple plain language, and analysing real business use cases. Our team will be collaborating with our clients, partners and subject matter experts across the markets creating whitepapers, webinars and industry articles to spark discussion and debate.

/Delivery Framework

We build solutions that perform in the most demanding of client environments and have a rigorous testing and quality assurance process. Our clients trust us to deliver a “right first time” deployment and migration path for the solutions being developed.

We have just published our Blockchain whitepaper and Retail industry article, as part of our Discover The Possible program. To download the content, visit www.invenica.com/discover
